Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 12, line 2 the terminology "double enveloping cone drive worm gear" is not understood. The description does not further clarify this term. Further, this does not appear to be a term that would be commonly known by those skilled in the art.

Claims 1-11 and 13-42 are allowed.

Claim 43 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/27/05.

Benjamins is cited to show an analogous articulated arm arrangement having a drive shaft with drive gears at opposite ends and fixed gears on articulatable members engaging the drive gears.
